

WorkQual seminar Trondheim 15.09.16 at Charlottenlund Upper Secondary School.

### The students view on The WorkQual Manual:

They use a system not unlike the manual and it is working. They are a bit unsure about the manual because they have not tried it.

The manual can make the company better as well as the following up of students in workplacement.

This manual will be of great value if it is used in a right way.

The manual will be used, but they question the companies effort to use the manual.

The manual is too general and it can be improved.

To increase the quality of the vet-education there has to be more focus into the in depth studies.
